studylib.net Mammals (mid-Triassic period to today). Mammals are advanced synapsids, (animals distinguished by having extra openings in the skull behind the eyes) By: Annika Johnson and Ally Sullivan. Chapter 32- Mammals by Annika Johnson The first true mammals appeared during the late Triassic Period, about 220 million years ago. These mammals were very small and probably resembled modern tree shrews, like the one in Figure 32-1. While dinosaurs ruled the Cretaceous Period, from about 145 to 65 million years ago, mammals were generally small and remained out of sight. 32-1 Introduction to the Mammals Section 32-1 Find Main Ideas As you read Chapter 32, list

the main characteristics of mammals on the tabs. As you learn about the main characteristics, write a benefit of the adaptation under the tab for each. Mammals Make the following Foldable to help you identify main characteristics of mammals. Fold a vertical sheet of notebook paper from side to side. Glencoe/McGraw-Hill Chapter 32: Mammals Monotremes Duckbill Platypus Marsupials Wombat First Mammals Marsupials are mammals that give live births, then raise their young in an external pouch. The pouch is called a marsupium, where the mother's nipples are located. At birth, the offspring will be Chapter 32: Mammals by Cary Tan on Prezi Chapter 32: Mammals. TAKS Practice Test.
