Dark Matter The six-person crew of a derelict spaceship awakens from stasis in the farthest reaches of space. Their memories wiped clean, they have no recollection of who they are or how they got on board. The only clue to their identities is a cargo bay full of weaponry and a destination: a remote mining colony that is about to become a war zone. Dark Matter (TV Series 2015–2017) - IMDb

Dark matter is a form of matter thought to account for approximately 85% of the matter in the universe and about a quarter of its total mass-energy density or about 2.241×10^{-27} kg/m³. Dark matter - Wikipedia

Dark matter could be white dwarfs, the remnants of cores of dead small- to medium-size stars. Or dark matter could be neutron stars or black holes, the remnants of large stars after they explode. The Fermi Gamma-Ray Space Telescope can detect high-energy gamma rays that may be emitted when dark matter particles collide. What Is Dark Matter? | NASA

Dark matter, a component of the universe whose presence is discerned from its gravitational attraction rather than its luminosity. Dark matter makes up 30.1 percent of the matter-energy composition of the universe; the rest is dark energy (69.4 percent) and “ordinary” visible matter (0.5 percent). dark matter | Definition & Facts | Britannica

Dark matter may be made of baryonic or non-baryonic matter. To hold the elements of the universe together, dark matter must make up approximately 80% percent of the universe. The missing matter... What is Dark Matter? | Space

Dark Matter (TV series) - Wikipedia Dark matter is stuff in space that has gravity, but it is unlike anything scientists have ever seen before. Together, dark matter and dark energy make up 95% of the universe. That only leaves a small 5% for all the matter and energy we

know and understand. This might be a surprise, but we don't know what most of the universe is made of. Dark Matter | NASA Space Place - NASA Science for Kids Dark matter Unlike normal matter, dark matter does not interact with the electromagnetic force. This means it does not absorb, reflect or emit light, making it extremely hard to spot. In fact, researchers have been able to infer the existence of dark matter only from the gravitational effect it seems to have on visible matter. Dark matter | CERN One mystery of dark matter is that it makes up the vast majority of all the matter in the Universe, yet we know surprisingly little about it. This mysterious "something" cannot be seen through... Our understanding of dark matter just became even more ... [+] dark matter and normal matter interact. Despite the indirect evidence for dark matter, we'd love to be able to detect it directly, which is something that can only happen if there's a non-zero ...
