Diabetes Weight Loss The key to weight loss for most people is simply finding the right combination of exercise, healthy foods, and portion control. No fad diet required. Get started Weight Loss | ADA - American Diabetes Association While intentional weight loss in people with diabetes is usually a good thing, unintentional weight loss is not. If blood sugars are very high, patients with diabetes tend to urinate a lot, and this results in dehydration as a possible cause of weight loss. Also, muscle breakdown can occur if sugars are too high, causing an unhealthy weight loss. Is Weight Loss Caused by Diabetes Dangerous? The Right Balance for

Your Risk Diabetes and sudden weight loss In people with diabetes, insufficient insulin prevents the body from getting glucose from the blood into the body's cells to use as energy. When this occurs, the body starts burning fat and muscle for energy, causing a reduction in overall body weight. Unexplained Weight Loss - Reasons, Symptoms & Causes Table 1 pools the data from the studies in the systematic review 10 in which the subjects had diabetes, reports weight losses at 6 and 12 months and 12-month changes in hemoglobin A 1c (A1C) levels, and compares the weight change of subjects with diabetes to that of subjects without diabetes. 16 Again, we see that weight loss plateaus at about 6 months but can be maintained until at least 12
