Pick a username Issues · iizukanao/picam · GitHub Recordbuf. recordbuf is a parameter which controls how many past keyframes should be included at the start of a recording. For example, recordbuf=1 means that a recording will start from the last keyframe, and recordbuf=2 means that a recording will start from the second last keyframe relative to when hooks/start\_record is created. The minimum value of recordbuf is 1. picam by iizukanao So if you want to either record or stream both video and audio on your pi, I'd highly
