Switchgear Castell Safety Castell Safety International
Everyone has the right to be safe at work Castell
trapped key interlocks have been used as part of
integrated safety systems across a wide number of
industries worldwide for over 95 years. Our products
are designed and manufactured to withstand the
environmental conditions where people and assets
need to be protected. Castell Safety - Trapped Key
Interlocks, LOTO and Drive ... Through development
and experience Castell has a number of methods to
isolate switchgear or machinery. This can be done
mechanically, through control circuitry or through
power circuitry. In complex operations a number of
isolations may need to occur to ensure that switchgear
or machinery is safe to work on. Our Products - Castell
Safety - Trapped Key Safety ... The FS and Q Interlocks
are designed for use as a mechanical interlock for
electrical switchgear. This is achieved through a
mechanical connection to the isolation equipment. The
standard unit is fitted with a 9.5mm square x 22mm
spigot that can be used to operate an isolator. FS/Q
Switchgear Interlock - Mechanical ... - Castell
Safety Castell delivers solutions across the electrical
network from power stations to transmission
equipment and from sub stations to incomer rooms.
The ability to work across HV, MV and LV means that a
Castell system can be used as a single solution to
provide personnel safety and ensure equipment is used
in the correct mode. Castell - Machine Guarding &
Switchgear interlocking ... Castell interlocks ensure
that a process is followed and cannot be circumvented

Introduction Interlocking in switchgear provides safety for personnel and equipment during following

procedures: • Switching of high, medium and low voltage • Switching incomers and feeders • Switching earthing systems • Maintaining substation equipment

The schemes in this applications guide are for

reference only and the overall system should be designed and reviewed by a competent electrical

engineer. Applications Guide - castell.com Through

development and experience Castell has a number of methods to isolate switchgear or machinery. This can

be done mechanically, through control circuitry or through power circuitry. In complex operations a

number of isolations may need to occur to ensure that switchgear or machinery is safe to work on. Isolation

Switchgear | Active Safety NZ Castells Expertise in

Industrial Safety The original Castell interlock concept dates from 1922 and was developed for the electrical

switchgear industry. For over 90 years Castell delivers solutions across the electrical network from power

stations to transmission equipment and from sub stations to incomer rooms. Switchgear - AJ

Hurst Switchgear Safety HV switchgear needs to be

maintained in accordance with the original manufacturers instructions or procedures compiled by suitably trained organisations. It is the duty of all users of switchgear to provide management systems that will ensure the safe operation of the switchgear. Switchgear Safety Through development and experience Castell has a number of methods to isolate switchgear or machinery. KEY EXCHANGE The use of key exchange boxes form part of the integrated solution to safety in machinery and switchgear applications. ACCESS CONTROL Access to the hazardous area needs to be assessed as either part body or full body access. Castell New Zealand - Trapped Key Interlocking Solutions Fortress Systems manufactures and supplies the Castell, H31 Fortress, and Ronis range of mechanical interlocks. Interlocks are mounted to the switchgear to lock in either the open or closed position, or in some cases both. Once the switchgear has been operated a key is released and taken to the next interlock in the sequence. Switchgear interlocking - Safety Solutions Castell Safety is a global leader in providing trapped key interlock safety solutions. Castell's business is centred on four key markets. Castell Safety International Limited, 217 Kingsbury Road ... This interlock switch uses a SI Guardmaster® safety relay in combination with an EMD Guardmaster safety relay to execute the timing sequence. Turning a non-removable key initiates the timer. When the EMD times out, its output energizes an internal solenoid which then allows the removal of either one or two trapped keys. Trapped Key Interlock Switches | Allen-Bradley Castell delivers solutions across the electrical network from power

stations to transmission equipment and from sub stations to incomer rooms. The ability to work across HV, MV and LV means that a Castell system can be used as a single solution to provide personnel safety and ensure equipment is used in the correct mode.
