pardalis), it's been proved that they also present two layers of guanine nanocrystal-bearing cells, called iridiophores, which reflect light.

Then a chameleon's green coloration is acquired by the blue light reflected by the iridiophores that goes through the outer yellow chromatophores. Colour change in chamaleons: an emotional rainbow |

All ... Chameleon displaying (CC 4.0) In another paper, Stuart-Fox et al. examined if this color change trait has extended into camouflage as well as social signaling. They tested to see if chameleons changed their colors in response to a predator, and if the intensity differed between the type of predator. The Myth Behind Chameleon Color Change - William Trautmann ... Chameleons are

ectothermic and, like most reptiles, depend on external sources of heat. namaqua chameleon | All you need is Biology Written for professional herpetologists, scholars, researchers, and students, this book takes readers on a voyage across time to discover everything that is known about chameleon biology: anatomy, physiology, adaptations, ecology, behavior, biogeography, phylogeny, classification, and conservation.
